

SERIBAÑO

BATHS AND FEATHER CARE

Birds need to bathe regularly and they actually enjoy it. Bathing water should be and stay clean in order to prevent it to become a parasite and microbe suspension.

SERIBAÑO is an antiseptic product with a parasite repellent effect and a marked washing power. It brightens feathers giving the bird a shiny aspect.

More cleaning and washing LATAC products include:

-SERISEPT: antiseptic solution for wounds, sores, blisters,..

-INSECTORNIS: cleaning product for cages, nests and materials susceptible of carrying parasite eggs or parasites.

-TETRASEPTOL: antiseptic and disinfectant product for material and premises. Its use is essential in epidemics.

Dosage rate and administration

Add 20 drops of SERIBAÑO to 100ml of bathing water (the size of a small bird bath). For bigger baths add a cap (9ml) in a liter of water.

Target animals

Canaries and ornamental birds

Presentation

Vials of 15 ml or 150 ml.
